PETITION FOR RULEMAKING

Fred R. Morton, Jr. ("Morton") hereby respectfully submits the instant Petition for Rule Making to amend the Commission's FM Table of Allotments to add Channel 242A at Iowa Park, Texas as its first FM allotment. In support whereof, the following is shown:

1. Fred R. Morton, Jr. Is in the business of building and operating radio stations and desires to provide a first FM service to Iowa Park and the surrounding area.
2. As demonstrated in the Engineering Exhibit attached hereto, the instant Petition proposal is in full compliance with the FCC Rules at 47 CFR 73.207 and the proposed allocation

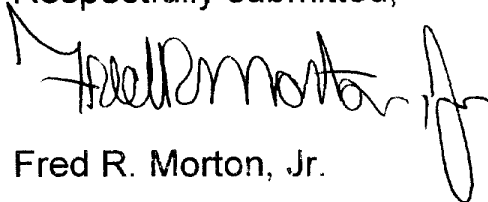

can be made without affecting the allocation of any other station.

3. Iowa Park, Texas has no existing aural broadcast facility and has been previously been determined to qualify as a community for allocation purposes.
4. The proposed reference point is 33 58' 22"N – 98 46' 08" W". This reference point is in full compliance with 47 CFR 73.207 and other requirements.
5. Since the proposed allocation would provide Iowa Park with its first FM coverage service, and contribute to the fair and efficient distribution of FM allocations, the instant proposal would be in the public interest. Morton will immediately file the required paperwork for authority to construct the Channel 242A facility upon grant of this Petition.

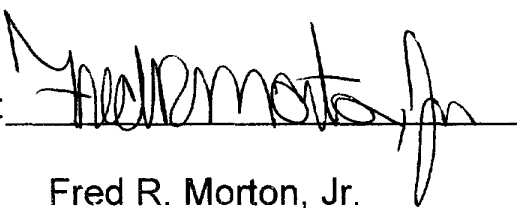

WHEREFORE, the foregoing considered, Morton respectfully requests that the Commission GRANT the instant petition, and AMEND the FM Table of Allotments as shown below:

<u>Community</u>	<u>Present</u>	<u>Proposed</u>
Iowa Park, TX	None	242A

Respectfully submitted,

Fred R. Morton, Jr.

The information contained herein is true and correct to the best of my knowledge, information and belief, and the intent of submission is to establish the new local FM broadcast service as outlined in the Petition.

PETITION FOR RULEMAKING
IOWA PARK, TEXAS

ENGINEERING EXHIBIT E-1

As described within the Petition, this exhibit will show that channel 242A can be allocated to Iowa Park, Texas without shortspacing or other allocation concerns. The proposed site is 33 58' 22" NL and 98 46' 08" WL. Due to the rural nature of the surrounding terrain, it is anticipated that land will be available for the construction of a tower suitable for a proposed station on channel 242A. The engineering exhibit (E-1) shows all pertinent allocations and stations, and the lack of conflict with the proposal herein.
